On the Cover

Most of Mississippi's freshwater prawns are grown in the Delta, but Chickasaw County producers Dale Obarr and Hal Craig harvested several hundred pounds from this pond in 2005. (Photograph by Bob Ratliff)

Back Cover

MSU has a long tradition of producing high-quality Edam and other types of cheese. (Photograph by Marco Nicovich)

4 Hurricane Response

MSU is lending expertise, manpower and other resources to efforts to recover from this year's powerful storms.

8 Delta Delicacy

Freshwater prawns are proving they have potential as a new aquaculture crop.

10 Pace Rice

A new rice variety from the Delta Research and Extension Center has qualities Delta producers say they need.

12 New Diesel

Soybeans are changing the fuel that powers the nation's trucks and tractors.

14 Tough Grass

An MSU-developed grass variety is performing well in demanding locations.

15 Tree Genes

Genetic research is helping unlock the secrets of tree reproduction.

16 Focus

Teaching, research and outreach in the Division of Agriculture, Forestry and Veterinary Medicine.

24 Say "Cheese"

The MSU sales store has a new look and location but the same great products.

25 Top Students

Students from the College of Forest Resources continued their winning ways in 2005.

26 Magnetic Research

CVM scientists are studying the use of electromagnetic fields in cancer treatment.

28 Award Winners

DAFVM personnel have been recognized for accomplishments.

29 Editorial

MSU's College of Veterinary Medicine is responding to the challenges and changes faced by veterinarians.

30 Breaking New Ground

Development partners help support a variety of activities.
