On the Cover

The fragrant water lily is one of the native aquatic plants being displaced by invasive species in Mississippi's waterways. The story beginning on page 12 explains how MSU scientists are tackling the problem of invasive aquatic plant species. (Photo by Joe Hudspeth, Jr.)

Back Cover

Even frogs are being squeezed by new plants, including algae species, in their habitat. (Photo by Joe Hudspeth, Jr.)

4 Soiless Sod

Turf grass exports may increase thanks to an MSU-developed process.

6 Student Research

Scholarships are giving student research projects a boost.

7 Meet Mississippi

A tour of the state gives new faculty a taste of the real Mississippi.

8 Duck Dinner

Rice left from harvest keeps ducks coming back to the Delta.

9 RITE Thing

Program helps rice producers manage input costs.

10 Medical Scholars

An MSU Extension program introduces high school students to the medical profession.

12 Plant Invasion

Plants can cause problems when they move into new habitats.

14 Bug Business

For people in the business of growing insects, MSU is the place to be.

16 Focus Section

Research and Extension centers take the university to the people.

22 Iraq Mission

An MSU alum is helping rebuild Iraq's veterinary infrastructure.

24 Garden Days

Fall garden days provide learning and fun.

25 Experienced Teacher

A CVM faculty member brings real-world experiences to the classroom.

26 Sweetgum Mats

University research has found new uses for sweetgum lumber.

27 Ports Rebound

Katrina knocked out Mississippi's Gulf ports, but they are back.

28 Landmarks Editorial

Management is no longer just a man's world.

29 News Notes

News of people and activities in the Division of Agriculture, Forestry and Veterinary Medicine.

30 Breaking New Ground

Development partners provide essential support for the division.
